AMENDMENTS TO THE SPECIFICATION

Amend the Abstract in accordance with the instructions that follow.

A web material is disclosed comprising a substrate in web form and multiple microwells, arranged on said the substrate in a predetermined pattern and separated from each other by separating zones, each microwell comprising a bottom and an upstanding surface formed by the adjacent separating zones, wherein the composition of said the bottoms on the one hand and the composition of said the separating zones and upstanding surfaces on the other hand show a different hypophilicity.

The invention further encompasses methods for manufacturing such web materials, and an apparatus for use of the defined web materials.

Insert on page 2 immediately after [DESCRIPTION] the text that follows:

This application is a continuation application of U.S. Pat. App. No. 09/949,359 filed 9/7/2001 which is pending.

Please insert the text that follows immediately before DETAILED DESCRIPTION OF THE INVENTION on page 4.

BRIEF DESCRIPTION OF DRAWINGS

Fig. 1 illustrates an embodiment of the present invention wherein 1 is an unwind, 2 is an application zone, 3 is a screening zone, 4 is a rewind section and 5 is a web.

Fig. 2 illustrates an embodiment of the present invention illustrating two microwells, wherein 6 is a bottom and 7 is an upstanding surface.
